

Cleaning up the harvest!

Savage Cleaner and Pre-cleaner

Pre-Cleaner 4324

Cleaner 4224

The Savage Cleaner and Pre-cleaner are designed to accomplish the tough work of cleaning your nut crop while it is still in the orchard or as part of a complete cleaning plant. These machines separate out sticks, leaves and other trash and remove most of the poor quality pecans.

The 4224 Cleaner is configured to allow for a more complete cleaning on its integrated conveyor-inspection table. The 4324 Pre-cleaner takes the cleaned product aloft and directly into a trailer or other container.

You can see these machines in action on our website and on our YouTube channel: [youtube.com/savageequipmentinc](https://www.youtube.com/savageequipmentinc).

Savage Cleaner & Pre-cleaner

Savage Cleaners and Pre-cleaners get the job done faster!

All controls are easily accessible and simple to operate.

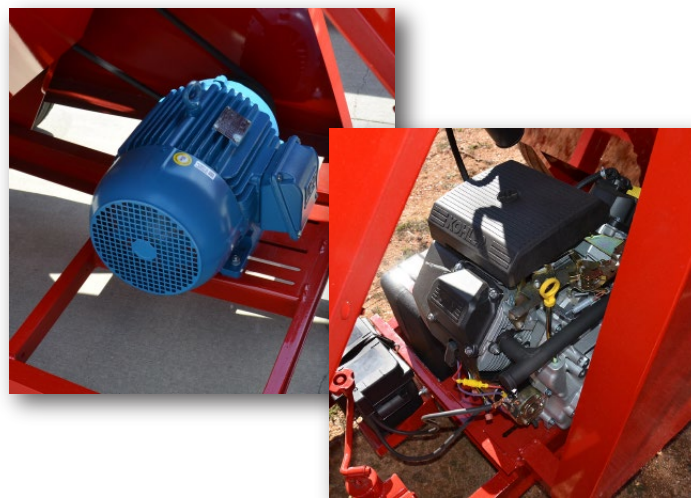

Why would you transport and store trash with your valuable nut crop? Savage cleaners and pre-cleaners remove sticks, leaves and other trash quickly and efficiently. Cleaning nuts soon after harvest greatly reduces the possibility of moisture damage to the harvested crop and gives you less to store. Cleaning your crop will also increase value and marketability.

Savage cleaners use a multi-step process to maximize cleaning efficiency in a small amount of space. A clod remover takes out small rocks and dirt clods; a unique scuffing wheel eliminates most shuck material; and a powerful fan blows away the leaves and sticks. The product can then be further hand-cleaned on the conveyor table (on the 4224 Cleaner) or elevated into a trailer (on the 4324 Pre-cleaner).

Redline Cleaner Features:

- Relocate easily to where the action is
- Available with Kohler gas engine or electric
- Controls for blower force, conveyor speed, scuffing action, and power
- Controls are easy to access and simple to use
- Discharge air chutes are configurable to either side of the machine
- Over-engineered throughout to last many harvest seasons

Savage Cleaners can be ordered with industrial grade electric motors or Kohler gas engines.

Cleaner/Pre-cleaner Specification	Model 4224	Model 4324
Weight (approximate)	2400 lbs	2400 lbs.
Length	245"	161"
Width (at intake hopper)	47"	47"
Height (with discharge attached)	115"	115"
Gas Motor	18 HP	18 HP
Electric Motor (single or 3-phase)	7.5 HP	7.5 HP
