

# A Legend in Pecan Equipment

**SAVAGE**

## **LEGACY Pecan Cracker**

### **Model 252S**

The world leader in pecan processing machines introduces the next revolution in pecan cracking technology: the 252S LEGACY Pecan Cracker. Savage crackers have become the essential component of profitable shelling operations over the past couple of decades, and the LEGACY cracker offers another giant leap forward for high-volume pecan processors.

Each Savage 252S Cracker can handle over 750 nuts per minute. Shellers tell us how pleased they are with a higher quality end-product and even more complete halves. Even native pecans crack better on the new Savage machine! Learn more about all the Savage Silverline machines on our website, [www.savageequipment.com](http://www.savageequipment.com).

# Legacy Pecan Cracker

## Savage 252S Crackers revolutionize nut-shelling operations!

### 252S LEGACY advantages:

It has been over fifteen years since Savage introduced a new cracker, and the 252S LEGACY Cracker has proven to be worth the wait. Everything we have learned about rapid pecan cracking and production of complete halves, is engineered into this amazing machine. This marvel of innovation is also easier to operate, requires less maintenance and has fewer moving parts.

Shellers who have employed the LEGACY Cracker report improved production statistics and less down time. They also consider it a game changer when it comes to cracking native pecans. Used in tandem with the Savage Vibratory Conveyor (as shown at right), operators can multiply the efficiency and space savings gained by incorporating these machines into their nut-shelling operations.

- Higher percentage of complete halves
- At least 87.5% more nuts cracked in an 18% smaller footprint (compared to 238S)
- Quick roll-out/roll-in machine replacement
- High performance with almost any nut size
- Unique valve system—less maintenance and fewer wear-parts
- Cleaner operation—less dust & less nut pieces
- Engineered for ease of operation and less downtime

Savage Cracker Comparison			
Specifications	Model 238S	Model 244S	Model 252S
Maximum Output	400 nuts per min.	1200 nuts per min.	750 nuts per min.
Dimensions LxWxH	45" x 31" x 51.5"	58" x 28" x 59"	41" x 28" x 51"
Discharge Ht	16"	14"	21"
Air Requirements	10 CFM at 90 PSI	12 CFM at 90 PSI	12 CFM at 90 PSI
Electrical Req.	110 or 230 VAC
