

Cleaning up the harvest!

Savage Sizer

The 3160 Sizer at 40-foot length

60" Stick Remover and Sizer
(shown with trash conveyor)

Stand-alone
48-inch Sizer

The Savage In-shell Sizer is a critical component of an efficient cleaning facility. It is designed to rapidly separate large volumes of nuts into a variety of sizes. These sizes can be configured to your unique requirements. This machine comes in three sizes and can sort nuts into two sizes or several sizes. A Savage in-shell sizer can help you market your nuts more effectively and increase the efficiency of your other

processing operations—especially cracking. For more than three decades, Savage designers and craftsmen have transformed nut-cleaning equipment and operations into a science. Visit our website to see the Savage In-shell Sizer and other Grayline components in action.

Savage Sizer

The Savage In-shell Sizer makes nut processing much more efficient.

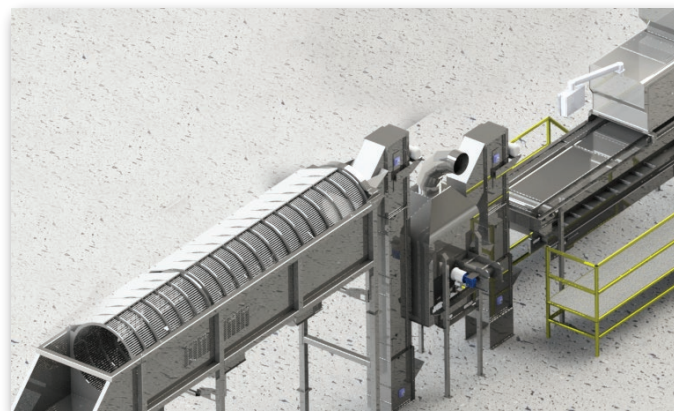

60" Sizer integrated with Stick Remover and Trash Conveyor

The Savage In-shell sizer is often integrated into a nut-cleaning plant after nuts have been fully cleaned. Size-sorted nuts can be discharged into super-sacks, bins or conveyors. A variety of discharge chute options are available. The rotating reel is divided into 2-foot sections, and each section can be configured for a different size of nut. These sections can be swapped out for other sizes if necessary. The machine is available in 36", 48" and 60" diameter reels.

This same machine is also sometimes used as a Cleaning Reel to separate out dirt/sand small stones and undersized nuts. Used for this purpose, the machine is usually integrated into the cleaning plant earlier in the process, usually just after nuts pass through the Stick Remover. In this type of setup, the machine can also be used to discharge oversized green sticktights for alternate processing. The powerful electric motor is available in single-phase or three-phase versions.

Sizer Features:

- Many options in the sizes and number of sizes to be sorted
- Size reels can be removed and reconfigured.
- Motors can be ordered single-phase or 3-phase.
- Available as an integrated unit with the Stick Remover or a stand-alone machine
- Over-engineered machines built to power through tons of product year after year

Cleaning Plant Options

The Savage In-shell sizer is just one part of the Savage Grayline. We also offer Stick Removers, Aspirators, Stone Removers, Dehullers, Optical Sorters and all manner of Elevators, Conveyors, Bins and Chutes. Contact your nearest Savage facility to learn more about our complete line of nut-cleaning equipment or check us out online at www.savageequipment.com.
