

Cleaning up the harvest!

Savage Stick Remover

Model 3448

**Model 3460
Mounted on Sizer with
Pre-Vac & Trash Conveyor**

The Savage Stick Remover often serves as the essential first stage of a complete nut-cleaning plant. It is designed to quickly and efficiently remove sticks and larger pieces of debris from the harvested product. Our latest generation Stick Remover can be integrated with the Savage sizing reel. This combination makes cleaning pecans more efficient and takes up less space. The Stick

Remover and Sizer can also be delivered as stand alone units.

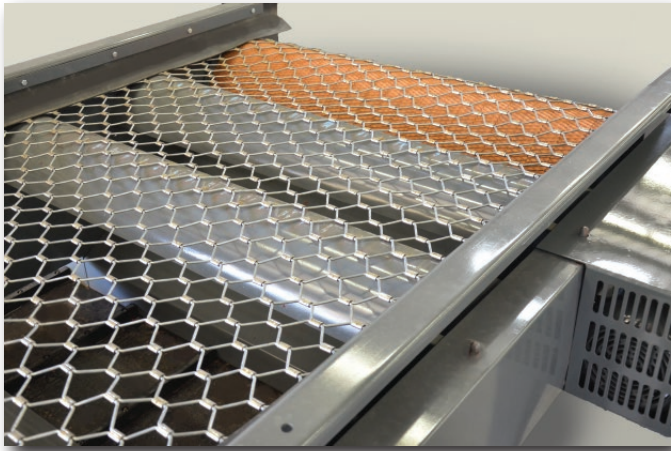

Visit our website or our Youtube channel, [youtube.com/savageequipmentinc](https://www.youtube.com/savageequipmentinc), to see the Savage Stick Remover and other Grayline equipment in action. Our email address is info@savageequipment.com.

Savage Stick Remover

The Savage Stick Remover is indispensable to high-volume nut cleaning.

Stick Remover conveyor chain

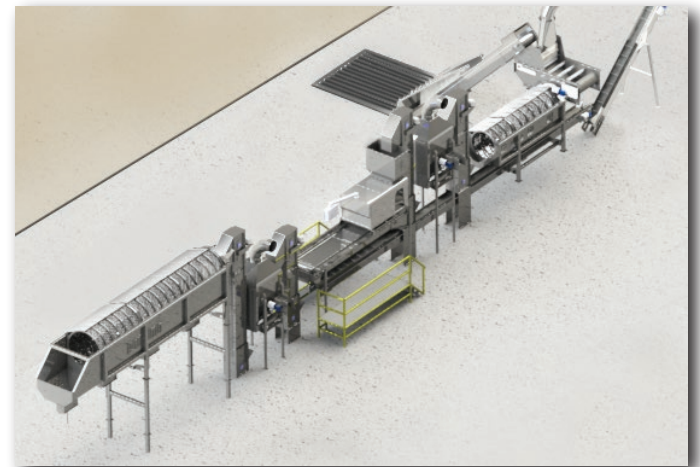

The Savage Stick Remover is highly effective at removing sticks and other large debris from harvested nuts. The design of the receiving area causes sticks to lay flat for easy removal while keeping the product moving at maximum flow rate. A series of radial “bumps” cause clumps of product to dislodge, so that good nuts end up where they should. The discharge conveyor can be configured to flow out either side, and the mounting height is fully adjustable to accommodate almost any cleaning plant configuration. The powerful electric motor is available in single-phase or three-phase versions.

Specification	Model 3436	Model 3448	Model 3460
Typical throughput (lbs/hr)	12,000	18,000	24,000
Width (conveyor/total)	36"/52"	48"/64"	60"/76"
Length	85 ½"	85 ½"	85 ½"
Height	fully adjustable		
Motor	¾ HP (single or three-phase)		

Savage Stick Remover Features:

- Stick Remover’s “good-product” discharge conveyor can be built to discharge on either side
- Motors can be ordered single-phase or 3-phase
- Available as an integrated unit or stand-alone machines
- Over-engineered machines built to power through tons of product year after year

Cleaning Plant Options

The Savage Grayline includes every element needed for a modern, efficient nut-cleaning plant. Grayline components include Aspirators, Belt and Bucket Elevators, Dehullers, Inspection Tables, Stick Removers, In-shell Sizers, and Stone Removers. Savage cleaning plants are quickly becoming the industry standard across the United States and in several other countries. See our website or other Grayline flyers for more equipment details.
