

*Sweep through harvest faster!*

# **Savage V-Sweeper**

Model 7520 V-Sweeper with 8960 Row-Vac

Savage's V-Sweeper will increase the speed and efficiency of your nut harvest season after season. This powerful machine sweeps a generous 13-foot swath, moving nuts and debris into a neat, straight row. The two independently floating sweeper heads are able to follow uneven terrain. Depending on your harvest conditions, the V-Sweeper, can be em-

ployed in tandem with Savage's powerful 8960 Row-Vac, or the 8548 Row Harvester to bring even greater labor savings to harvest season. You can check out Savage machines in action on our website, or [www.youtube.com/savageequipmentinc](http://www.youtube.com/savageequipmentinc).

# Savage V-Sweeper

*The Savage V-Sweeper will help you harvest nuts faster!*

The Savage V-Sweeper will improve your bottom line by making the rest of your nut harvest operations more efficient. You'll get more nuts to market quicker. It is hydraulically operated, and hoses are simple to connect. The rotating tine bars consist of heavy-duty, formed steel and individual rubber fingers so the machine powers through grass and reaches down deep to move the nuts. Each side of the sweeper retracts to a vertical position, making it easier to transport, especially in tight spaces.

V-Sweeper mounted in tandem with Savage 8548 Row Harvester

## Savage Sweeper Features:

- Convenient T-bar storage stands
- Mounting bracket jack stands allow easy tractor connection and disconnect.
- Heavy-duty double ball bearings minimize down time and repairs.
- Retractable sweeper heads for easy transport and maneuvering
- Free-floating sweeper heads perform well in uneven terrain
- Heavy steel tines and rubber fingers
